Foreword

The Agriculture Sector is the backbone of all economic activities. Not only is a vast majority of our rural population involved in it, but this sector also contributes substantially to the State Domestic Product (SDP). The responsibility for providing timely and reliable statistical data, about the main components relating to Agriculture namely, area, average yield, production and holdings under different social groups lies on the statistical wing of the Financial Commissioner Revenue's office.

Jammu and Kashmir Government has been conducting Agricultural Census on a quinquennial basis since 1970-71. Till date, Nine Agricultural Censuses have been conducted and the present Census is 10th in the series. This publication is based on 2nd Phase of the 10th Agriculture Census with reference year (2015-16). It contains key results on Various Agricultural characteristics like dispersal of holdings, Tenancy status, Irrigation status, cropping pattern etc. The tables have been formulated as per the guidelines issued by the Government of India, Ministry of Agriculture, New Delhi.

This gigantic task has been completed with the involvement of the Planning and Statistics Wing in my office and the Revenue staff at the Tehsil level who deserve kudos for this painstaking collection, supervision, scrutiny and tabulation of data on so many parameters.

I hope this publication will prove to be useful for policy makers, planners, researchers and all those interested in Agricultural Development in Jammu and Kashmir.

PREFACE

The State of Jammu & Kashmir has been conducting a quinquennial Agriculture Census as a part of All India Programme since 1970-71. So far, nine Censuses have been conducted and the tenth one with reference year 2015-16 is going on in the State. The Census is conducted to collect key information about the structure of Agriculture holdings in the Country and monitor changes that take place over time. The concepts and definitions used in the Agriculture Census are broadly in conformity with those adopted in the World Census of Agriculture. The basic statistical unit for data collection in Agriculture Census is 'Operational Holding' rather than "Ownership Holding", as the farm level decisions are taken by persons who operate land and not by those who own it.

The Agriculture Census is conducted in three phases (Phase-I, Phase-II & Phase-III) which are statistically lined. In Phase-I, all the operational holdings in the state are enumerated and the results giving number and area of operational holdings at various administrative levels like Tehsil, District, Division and State are generated along with their size and social category-wise distribution, types of holding and gender classification.

I am happy to record that, Phase-II results have been made available in public domain .This has been possible because of active and whole-hearted cooperation by all the officers/officials associated with the programme of Agriculture Census, 2015-16 in the State and at Central level.

I would specifically like to place on record my appreciation to the field functionaries of the Revenue Department for their contribution in Census work without whose efforts this mammoth exercise would not have been completed. I would also like to commend the efforts of officers and staff of the Agricultural Census Section in this Department who worked sincerely and tirelessly to monitor census operations and provide administrative and technical support to the field Agencies.

I believe this report will serve as a reference for policy decisions and will also support research studies in the agriculture and allied sectors for development and farmers welfare.

Concepts, Definitions, Methodology and Scope of Census Data

1.1 Operational Holding

1.1.1. All land which is used wholly or partly for Agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

1.2 Technical Unit

1.2.1. A technical unit has been defined as the unit which is under the same management and has the same means of production such as labour force, machinery, animals, credit etc.

1.3 Agricultural Production

1.3.1. Agricultural production includes growing of field crops including oilseeds, fodder grass, tree nurseries (except those of forest trees), fruits, vegetables and flowers.

1.3.2 Grass would be treated as a crop if special efforts are made to raise it.

1.4 DE FACTO Verses DEJURE Position

1.4.1 Being a land record, the UT of J&K comprising records of rights, tenancy and crop inspection of each survey number are maintained in various registers/forms by the revenue official, namely, the patwaris. The Agriculture Census data is compiled on the basis of retabulation approach. The question that arose in adopting this approach was about the reliability of data regarding tenancy particulars, as the de facto position may be different from de jure position. The de facto position related to what was actually the situation on the ground. In order to get reliable data on de facto position, the concerned tehsils undertook updating of records on the eve of the Census to reduce de jure error. However, marginal differences may still exist though the primary workers were generally knowledgeable enough to record accurately the actual situation as far as possible.

1.5 Operated Area

1.5.1 Operated area includes both cultivated and uncultivated area, provided part of it is put to Agricultural production during the reference period. If, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-Agricultural uses, the total area of the operational holding is equal to the total geographical area of all the four survey numbers.

1.5.2 It would also cover the land occupied by the farm buildings, including the house of the holder, provided such buildings are located within the operated area. If the farms buildings are located outside the cultivated area and are covered under abadi area, such area of buildings are not included under operated area.

1.5.3 Operated area exclude government forest land, government waste land, village common grazing land, abadi area etc. If Government wasteland is allotted to an individual then it is included in the holding.

1.5.4 If the entire area of the holding (the area of all the survey numbers of an operational holding) is put to non-Agriculture use and/or it is under old fallow, it is not considered as operational holding. If, however, the entire area of operational holding is under current fallow during the reference year but was cultivated in the preceding year, this is still considered as operational holding.

1.5.5 In some cases, land is divided amongst all the members of the family. Where it is divided between the husband, wife and minor children and the cultivation is done by the husband as the head of the family, the land may appropriately be treated as one operational holding.

1.5.6 There might be cases where in the records holding is shown jointly in the name of more than one co-sharer while in fact the land may have been privately divided and the co-sharers are independently cultivating. In such cases where there is no dispute, they are treated as many operational holdings as the number of independent cultivators. This is because in Agriculture Census the data is collected on the basis of defacto position rather than dejure position.

1.5.7 Somewhere in the UT of J&K, the Zamabandi register against a Khata, name of three or four persons are shown. While from the records it appears that there is only one holding, in practice, all the three or four brothers are actually cultivating the land independently of each other although there is no legal partition of land. From the Census point of view, this constituted three or four operational holdings.

1.5.8 Cultivated areas in the UT of J&K Forests for which no detailed land records are available with the Revenue Agency are excluded for Census purposes.

1.5.9 The operated area comprise of:

- i. Land owned and self operated.
- ii. Land leased in.
- iii. Land otherwise operated.

1.5.10 Land owned and self operated: Land for which the cultivator has the right to permanent heritable possession is considered as owned. This includes:

- i. Land held from Government or others under grant or lease or assignment with right of permanent heritable possession with or without right of transfer.
- ii. Land operated under perpetual lease.

Self operated land includes:

- i. Self cultivation.
- ii. Land cultivated through members of the family.
- iii. Land cultivated with the help of hired labour. Land owned and self operated should not include land leased out to others.

- 1.5.11 Leased in: Area leased in is defined as land taken on lease from others without any permanent right of possession for the lessee. Land may be leased in for:
- i. Fixed money.
 - ii. Fixed produce.
 - iii. Share of produce.
 - iv. Usufructuary mortgage: Ownership of the property remains with the mortgager but the possession is with the mortgagee (i.e. the person to whom the mortgage is made or given). Income from the property accrues to the mortgagee and the mortgage is terminated as soon as the full amount is realized.
 - v. Other terms to be specified.

- 1.5.12 Area otherwise operated: This include encroachment, land forcibly occupied, unauthorized or land in dispute etc., which cannot be treated as owned or leased in, as per the definitions given above.

1.6 Operational Holder

1.6.1 An Operational holder is the person who has the responsibility for the operation of the Agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The operational holder may be individual/Joint/ Institutional.

- i. Individual: If the holding is being operated either by one person alone or by group of persons who are the members of the same household it is considered as an individual holding.
- ii. Joint: If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an Agriculture holding, such holding are considered as joint.
- iii. Institutional: Holdings such as government farms, cooperative farms, lands managed by trust is treated as Institutional.

1.7 Resident and Non-resident operational holder

1.7.1 All the cultivators residing in a particular village and cultivating some land within the same Tehsil are resident cultivators of that village irrespective of the fact whether they are cultivating land in that village or not. A resident cultivator may, therefore, have either (i) entire area of the holding located in the village of his residence; or (ii) partly within the village of residence and partly outside; or (iii) entirely outside the village of residence.

1.7.2 An operational holder operating area outside the tehsil in which his village of residence falls, will not be treated as a resident cultivator of the village of his residence for Agriculture Census purposes rather he will be treated as a resident cultivator of that village outside the tehsil where the area falls.

1.7.3 If the area in a particular village is operated by a Cultivator who resides outside that village but within the same tehsil, he is a non-resident operational holder for that area. However, if this operational holder is resident of a village lying outside the tehsil in which the area is located, he is treated as a resident operational holder (deemed resident) of the village where the area is located.

1.8 Complete/Part-Holding

1.8.1 A holding is said to be complete holding if the entire operated area of that holding is located in one village. If the operated area is spread over more than one village, it is considered as part-holding.

1.8.2 Tehsil is taken as the outer limit for consolidation of part holdings.

1.9 Wholly Irrigated, Partly Irrigated and Wholly Unirrigated Holdings

1.9.1 If the entire net area sown in an operational holding is equal to net area irrigated, such holdings are considered as wholly irrigated holding. In case part of the net sown area is irrigated, it is partly irrigated and if the entire sown area has not received any irrigation during the year of reference, such holding are wholly unirrigated.

1.10 Land Utilization

1.10.1 Operated area is classified into six broad categories:

- i. Net area sown.
- ii. Current fallow.
- iii. Fallow Land other than current fallow.
- iv. Other uncultivated land excluding fallow land.
- v. Culturable waste; and
- vi. Not available for cultivation.

1.10.2 Net Area Sown: Total area sown with crops and orchards counting area sown more than once in the same year only once.

1.10.3 Current fallow: Cropped area, which are kept fallow during the current year but was cultivated in the previous year. For example with any seeding area is not cropped in the same year, it may be treated as current fallow.

1.10.4 Fallow Land other than current fallow: All lands, which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years i.e. equal or greater than one year but less than or equal to five years.

1.10.5 Other uncultivated land excluding fallow: This includes:-

- i. Permanent pastures and other grazing lands: All grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands are, however, excluded.
- ii. Land under Miscellaneous Tree Crops: Cultivable land, which is not included in the net area sown but is put to some Agriculture use. Land under Eucalyptus and Willow trees and others which are not included under ‘Orchards’ are covered under this category.

1.10.6 Culturable Waste: All lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or the other i.e. >5 years in succession. Such lands may be either wholly or partly covered with shrubs and jungles, which are not put to any use. Land once cultivated but not cultivated for five years in succession are also included in this category.

1.10.7 Not available for cultivation: This includes Forest area under non-Agriculture use, barren and uncultivable land belonging to the operational holder.

- i. Forest: All lands classed as ‘Forests’ under any legal enactment dealing with forests or administered as forests whether UT owned or private and whether wooded maintained as potential forest land. The area of crops raised in the forest and grazing land or areas open for grazing within the forests would be included under the forest area. Only private forest is covered for the purpose of Agriculture Census.
- ii. Area under Non-Agriculture Use: All lands occupied by buildings or ponds or lands put to use other than agriculture is included in this category. Only such lands within the cultivated holding of operational holder should be covered in the Census.
- iii. Barren and Uncultivable Land: All barren and uncultivable land within the cultivated holding of the operational holder should be covered in the Census.

1.11 Methodology adopted for Agriculture Census

1.11.1 The methodology adopted for carrying out the Agriculture Census for Land Record and non-Land Record UTs is as follows:-

- i. The UT of J&K having comprehensive land records and the information was collected on complete enumeration basis for all villages by retabulation method from the land records in respect of data on number and area of operational holdings. For collection of data on other characteristics, namely, tenure and tenancy, leased in area, land use, irrigation, area under different crops, etc., 20 percent of the villages selected randomly from each tehsil constituted the basis. In these 20 percent villages, information relating to the above characteristics was compiled from the relevant khatauni and khasras registers in respect of all the resident cultivators. Resident cultivators of urban areas were also covered.

- ii. In UT of J&K, a fairly comprehensive system of land records consisting of various village forms and registers giving detailed information, on land and its utilization exists. The current Agriculture Statistics, particularly those in respect of cropwise area of individual fields, are collected and cropwise abstracts prepared for the village as a whole for each cropping season. These data are then aggregated at successive levels like patwari circle to GQ circle, to tehsil, district and UT levels. While retabulation of records by and large, the patwari consults the khasra register and notes down the name of the cultivator against each khasra number and places together the survey number/sub-survey numbers cultivated by the same cultivator. Some of the existing land records like Khatauni are also used in preparing the list of cultivators. The names of cultivators not owning the land are added with the help of khasras register. A Set of Schedules desired for collection of data under the first two phases of the census is as under:-
- a) Schedule L1-Listing Schedule for resident operational holdings.
 - b) Schedule L2- Listing Schedule for non-resident operational holdings.
 - c) Schedule T1-Size class wise area and number of holdings.
 - d) Schedule H-Tenancy and irrigation status, land utilization and cropping pattern.

1.12 Size Classes and Broad Size Groups of Holdings

1.12.1 The data are presented at UT level in the following size classes and size groups of operational holdings.

| S.No. | Groups | Classes(in hectares) |
|-------|-------------|-----------------------------------------------|
| 1 | Marginal | 1. Below 0.50 2. 0.50-1.00 |
| 2 | Small | 3. 1.00-2.00 |
| 3 | Semi-Medium | 4. 2.00-3.00 5. 3.00-4.00 |
| 4 | Medium | 6. 4.00-5.00 7. 5.00-7.50 8. 7.50-10.00 |
| 5 | Large | 9. 10.00-20.00 10. 20.00 and above |

Main Findings that emerged from analysis of Phase-II of 10th Agricultural Census 2015-16.

(A) Operational Holders and Area operated

- I. The total number of operational holdings in the UT is **1416509** operating on **842307.95** hectare of area in 10th Agriculture Census (2015-16) , whereas it was **1449397** holdings operating on **895360.57** hectare of area **in 9th Agriculture Census (2010-11)** registering a decrease of **2.27%** in number and **5.93%** in area operated respectively.
- II. Out of the total holdings of **1416509**, schedule caste constitutes **99040** holdings, operating on **63907.70** hectare of area in 10th Agriculture Census (2015-16) where as it was **104846 holdings operating on 73275.61 hectare of area in 9th Agriculture Census (2010-11), registering a decrease of 5.54% in the holdings and 12.78% in area operated respectively.**
- III. The **Schedule Tribes category have 208733** operational holdings operating on **134656.85** hectare of the total operated area in 10th Agriculture Census whereas it was **181329** operational holdings operating on **129812.25** hectare of area registering an increase of **15.11% in operational holdings and 3.73% in operated area** as compared to 9th Agriculture Census respectively.
- IV. During 10th Agriculture Census 2015-16, **454987.22** hectare of grass cropped area is irrigated and **502273.740** hectare of grass cropped area is un-irrigated whereas in 9th Agriculture Census 2010-11, **456102.020** hectare of grass cropped area is irrigated and **651834.500** hectare of grass cropped area is un-irrigated registering a decrease of **0.24%** in grass cropped irrigated area and **22.95%** in grass cropped un-irrigated area respectively.
- V. The Wholly Owned & Self Operated Holdings and partly Owned & partly leased-in Holdings constitutes **1375128** and **740** numbers of holdings operated on **797854.404ha , 958.57ha**, of area during 10th Agriculture Census whereas it was **1424632** and **276** numbers of holdings operated on **871373.42 ha. and 505.79 ha** of area during 9th Agriculture Census respectively.
- VI. During 10th Agriculture Census the Wholly leased-in Holdings and Wholly otherwise operated Holdings constitutes, **960** and **23031** operated on **482.486 ha and 17051.496 ha.** of area respectively, while as it was **564** and **14555** holdings operated on **328.43 ha. and 10478.53 ha.** of area respectively in 9th Agriculture Census.
- VII. Under the 10th Agriculture Census (2015-16), the **Net sown area, area under current fellow, net area cultivated and uncultivated area** are noted as **764010.553ha. , 15851.383ha. , 779861.936ha. and 62446.014ha., respectively** whereas it was **779242.050ha., 30144.00ha., 809386.050ha. and 85974.520ha** during **9th agriculture**

Census (2010-11) which has shown a decrease of 1.96%, 47.41%, 3.65% and 27.37% respectively.

- VIII. During 10th Agriculture Census, 642798 numbers of operational holdings operated on 299954.964 ha. of area are **wholly irrigated** and 526709 number of operational holdings operated on 293919.60 hectare of area noted as **wholly un-irrigated** whereas, 666479 number of operational holdings operated on 311010.89 hectare of area was noted as **wholly irrigated and 631435 number of operational holdings operated on 369434.430 hectare of area was noted as wholly un-irrigated** during 9th Agriculture Census(2010-11) thereby registering a decrease of 3.55% in number and area for wholly irrigated and 16.59% in number and 20.44% in area for Wholly un-irrigated.

(B) TENANCY OF OPERATIONAL HOLDINGS

In Agriculture Census 2015-16, Operational Holdings are categorized according to the different types of ownership and operations. These categories may be wholly owned and self-operated or wholly leased-in or wholly otherwise operated or partly owned and partly leased-in and partly otherwise operated.

(i) Operational Holdings

The information on characteristics of Agricultural operational holdings of Scheduled castes and scheduled tribes is collected separately during Agriculture Census 2015-16 to facilitate policy decisions for welfare of these social groups. The number and area of operational holding by size-classes and percentage distribution in Agriculture Census 2015-16 for Scheduled castes holding may be seen in Table 6&7

It may be seen from table 6 & 7 that out of the total of 99040 Schedule castes operational holdings in 2015-16, marginal holdings accounted for 80.44 percent followed by small(14.27 percent), semi-medium(4.76 percent),medium(0.52 percent),large(0.01 percent). Out of 63907.700 ha. of operated area only 45.87% falls under marginal size class followed by 30.32% under small size class, 19.50 % under semi-medium, 4.13% under medium and 0.18% under large size class respectively. The number of operational holdings and area operated by them decreases with the increase in the size of holdings.
